

Process payroll easy and fast in
GCC and West Africa

a-Pay is designed to serve companies from GCC region countries as well as companies located in West Africa. Simplicity is the main idea in creating this solution. It provides companies possibility for calculating standard payroll, end of service as well as proration for salary due to changes in the amount in some period before.

a-Pay enables companies to provide accurate accrual calculations for all kind of accrual plans with simple formulas. Benefits, pension and contributions are also out of the box features of a-Pay.

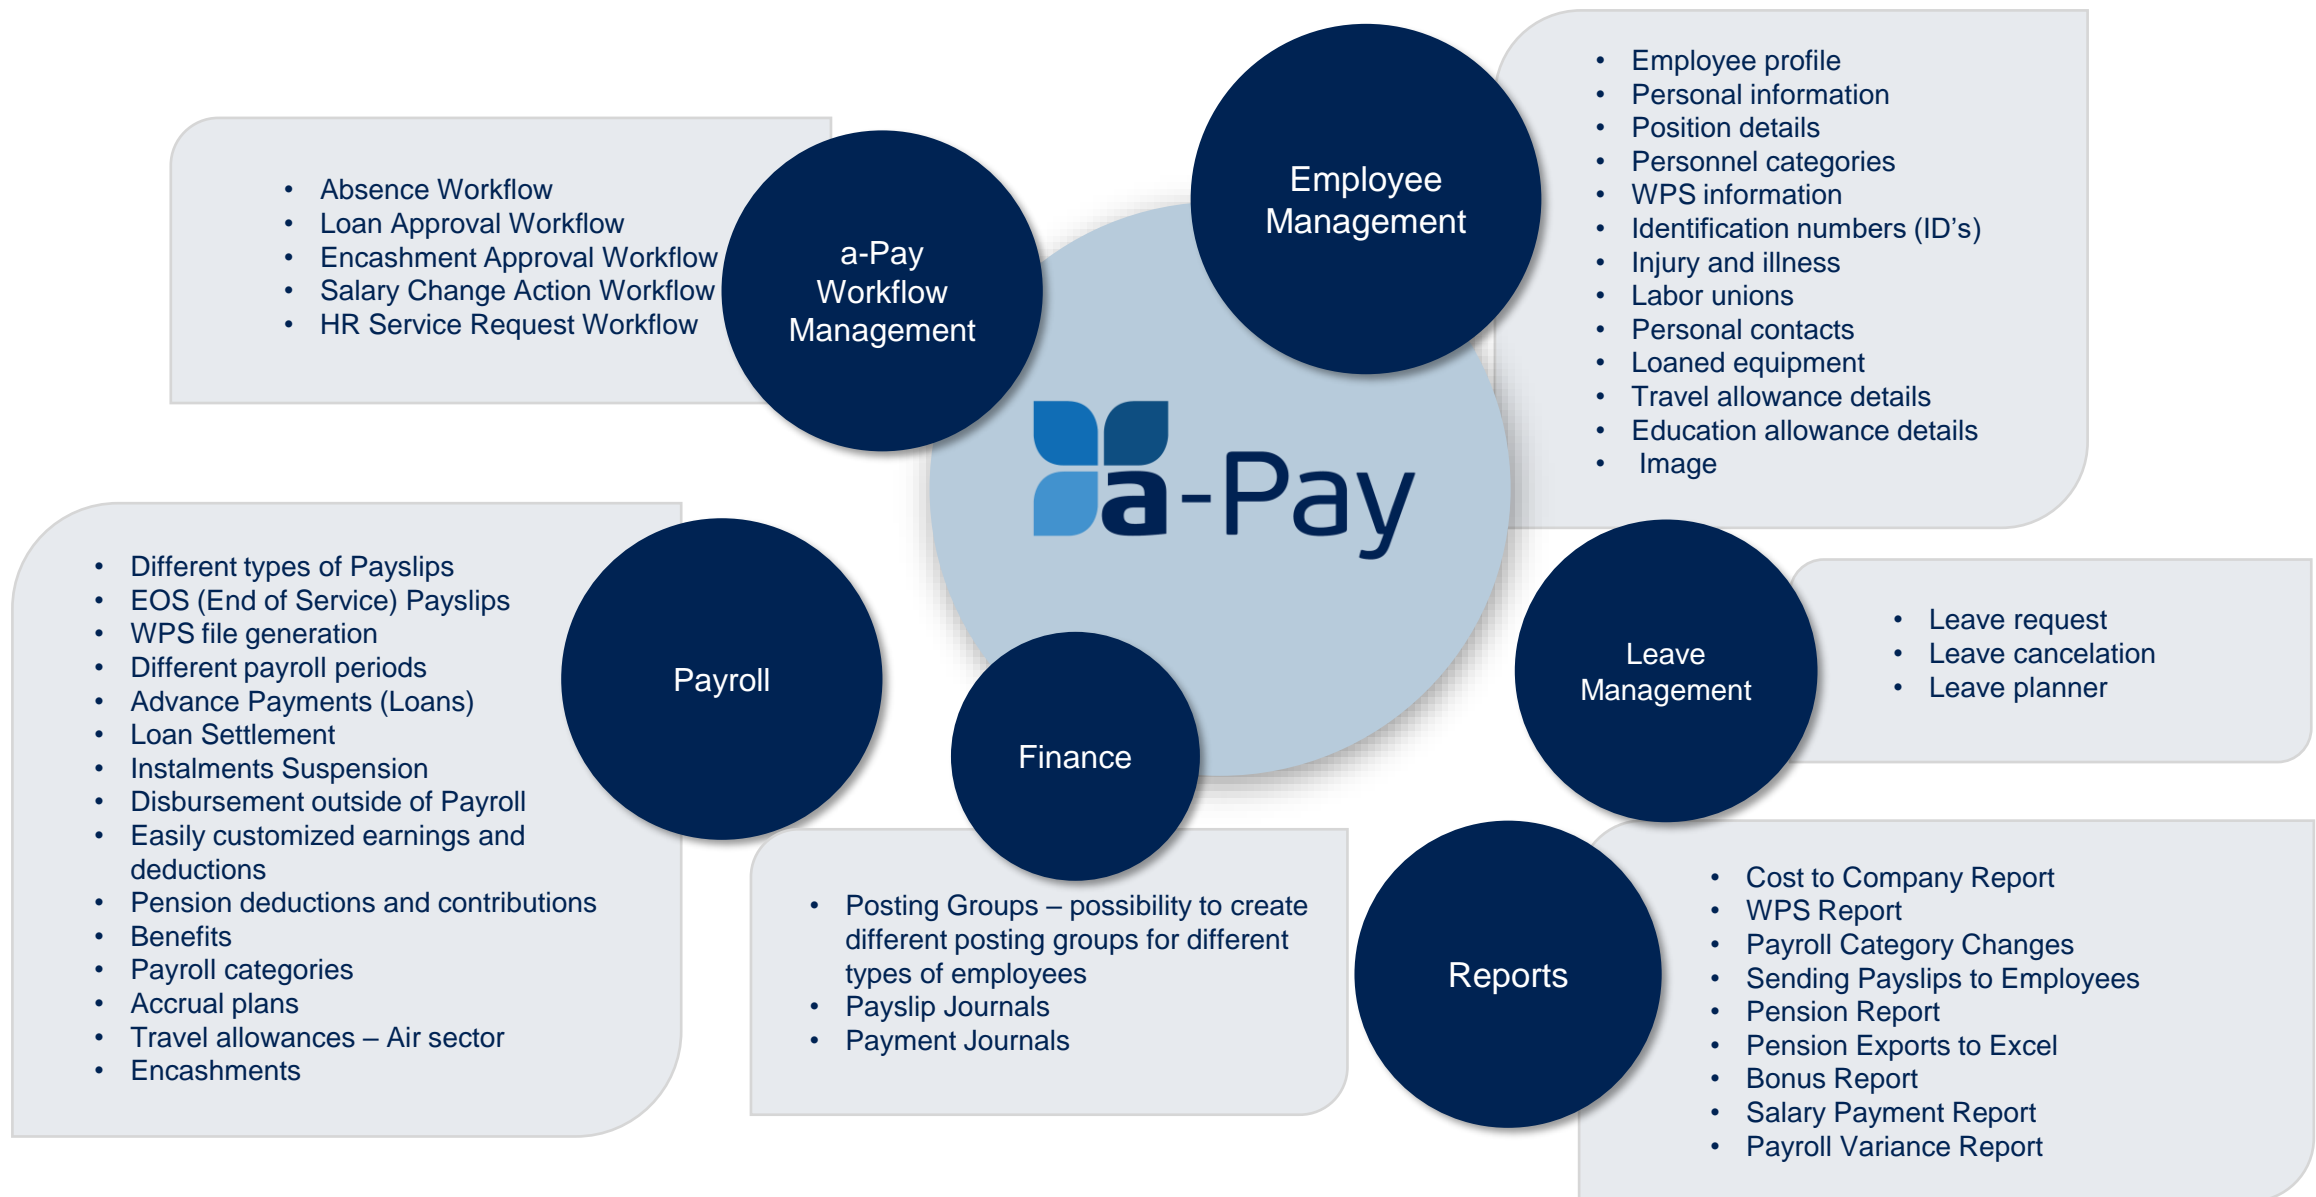

a-Pay allows different types of payroll periods according to different calendars that employees could be assigned to. Through a-Pay companies can easily control leave management of their employees as well as the Injury and Illness requests.

Human Capital is the most important asset that companies are consuming, especially in this world of services we live in. Keeping employee's satisfaction on higher level is a must for the success of every organization.

Simplicity in creating payroll is as well reflected in the way of setting up the parameters of the a-Pay module. There is direct integration of a-Pay with the Dynamics 365 for Finance and Operations HR module as well as with the Finance (GL, Journals, etc.).
