VMware Horizon Cloud
On Microsoft Azure

Login Consultants

About us

- IT specialist in innovative digital workspace solutions and services

- We support the digital workplace life cycle from advice, implementation, migration and adoption to management

- With a team of passionate, specialized, ambitious people

What is Horizon Cloud on Azure?

Horizon Cloud on Microsoft Azure provides customers with the ability to pair their existing Microsoft Azure infrastructure with the VMware Horizon Cloud Service.

With the Horizon Cloud Service, the control plane is consumed as-a-service and the workload capacity is hosted on a bring-your-own Azure subscription. Horizon Cloud on Azure has an easy deployment process, simplified management capabilities, and a multi-cloud architecture.

Why VMware HZCoA?

- Use the enterprise-class features and user experience of VMware Horizon Cloud on top of Microsoft Azure.

- Pay per use

- Scalable and flexible

- Secure by design

- Available worldwide

- Accessible anywhere from any device

What is the VMware HZCoA kickstarter?

The VMware Horizon Cloud on Azure Kickstarter quickly enables cloud-based desktops and applications that are directly consumable within your organization.
