Cloud Cost Modelling – Done Right

Microsoft Azure

Jtwo Solutions - makers of cloudstep.io

cloudstep[®] helps CxO's understand the cash flow and operational benefits that public cloud can provide. cloudstep[®] can be used by you and your IT partners to unlock your True Total Cost of Ownership. (TCO) of IT.

WHAT WE OFFER

You can't implement change without the business case. You first need to understand the costs and capabilities as they stand. Once you have a better understanding of where you are you can start looking at scenarios for reforms.

model

Cost pressures due to COVID-19 means you are expected to do more with less. cloudstep® can build a five-year capital and operation expenditure overview in seconds. You can build complex business cases based on evidence and hard costs, not speculation.

transition

The change process is complicated, including migrations, legacy infrastructure and capital projects.

cloudstep® summarizes the change program in waves allowing the business and technical teams to understand what is ahead, where savings will occur, and the internal effort required.

analyse

cloudstep® can discover information about your physical and virtual infrastructure. It looks at the entire portfolio of services from Azure and can show you the cost of your server fleet deployed in the cloud. cloudstep® navigates the minefield of on-demand, reserved, spot and other instance types comparing apples for apples.

WHAT OUR CUSTOMERS ARE SAYING

"cloudstep® provided us the clarity needed to obtain board and executive approval to adopt Azure cloud services in our organisation" LEARN MORE

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

cloudstep[®] Unlock Cloud Success.

WHY AZURE

BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
