Cloud Adoption

Most organizations across Industries often fail to move beyond the POC to achieve the targeted scale of cloud adoption. This happens due to several reasons including inability to implement different use cases, inability to deliver a smooth, trouble free transition experience to end users or not providing high quality end user experience.

"At this point, cloud adoption is mainstream," said Sid Nag, research vice president at Gartner. "The expectations of the outcomes associated with cloud investments therefore are also higher. Adoption of next-generation solutions are almost always 'cloud-enhanced' solutions, meaning they build on the strengths of a cloud platform to deliver digital business capabilities." https://www.gartner.com/analyst/53485

CHALLENGES

- Inappropriate designing and sizing of VDI network thereby impacting computing resources (e.g., networks, servers, storage, applications, and services).

- Managing integration of complex applications that need to connect to cloud.

- Securing end user data, applications privacy and adherence to security compliance.

- Ensuring round the clock availability of cloud network for enhanced performance.

- End-user resistance to Adopt the new technology.

CLOUD ADOPTION IS IDEAL SOLUTION

The ideal solution should accelerate EUC transformation journey for the customers, who:

- Have clearly defined use cases and are looking to implement Cloud Desktops.

- Already have done a POC or are actively in the process.

- Have limited time with in-house team for EUC implementations.

- Do not have any managed services provider to help with post EUC support to address teething issues.

- Have bought Cloud Desktop infrastructure but are struggling to implement all the parameters of the product.

DESIRED OUTCOMES

- End-to-end management of complete workload transfer from existing infrastructure to the cloud.

- Smooth upscaling from the initial POC stage to migration of all users across all geographic locations.

- Assistance with realizing the complete benefit of moving to the cloud.

Anunta

VMWARE HORIZON ON AZURE: 10-WEEK ADOPTION SERVICES (PREMIER IMPLEMENTATION 6-WEEK + OPTIMIZATION 4-WEEK)

Accelerate your EUC transformation and deliver unmatched end-user experience using Anunta's 10-week Adoption Services covering Custom Deployment Services to build and configure Cloud Desktop environment using VMware Horizon on Azure/Windows Virtual Desktop (WVD) technology followed by Optimization services

SET UP CLOUD ENVIRONMENT APPROPRIATELY

- Successfully implement each use case using single-session and/or multi-session windows virtual desktop (WVD).

SEAMLESS MIGRATION AND RICH END USER EXPERIENCE

- Successfully take complete End user desktop environment to the Cloud with seamless access to applications, data and peripherals.
- Resolve teething issues, monitor and stabilize Cloud Desktop environment.

HIGHLY AVAILABLE, FLEXIBLE AND AGILE AZURE PLATFORM

- Seamless access to Cloud Desktop infrastructure.
- Choose form an array of desktop size.
- Quick ramp up of infrastructure to accommodate more users.

Our Customer satisfaction rating stands at 4.75 out of 5 for our consultant's performance and technicality.

Our Adoption services offer Custom Deployment Services followed by Optimization Services. We help enterprises, who have taken the first steps towards implementing Cloud Desktops, define a full adoption plan and then take complete ownership of the EUC transformation from discovery, implementing use cases using Single-Session and/or Multi-Session Windows Virtual Desktop (WVD), configuration of advanced Horizon features, and migration to complete stabilization of the Horizon on Azure based Cloud Desktops before handing it over as a steady state operations to the customer's IT team in a time bound manner.

Benefits

- Customer is de-risked of the process of selecting the right Desktop size, application compatibility, technology adoption etc.

- Seamless Integration of Horizon with Azure to meet your EUC environment

- Use Azure's global footprint to take Cloud Desktops near to the End Users

- Supports quick scaling up of the EUC infrastructure to accommodate large user base

- Design Cloud desktop environment and migrate existing workload leveraging Azure's Agile infrastructure

- Smooth upscaling from the initial POC stage to migration of all users across all geographic locations

VMWARE HORIZON ON AZURE: DETAILS

Implementation Parameters	Implementation (Up to 150 users)
Preparation for the Production environment (~2 Calendar Weeks)	
Project Management	Yes
Image Building & Optimization	Up to 2 Image and 2 Use Case
Use Case Identification	Yes
Prepare prerequisites for onboarding tenant	Yes
Implementation (~4 Calendar Weeks)	
Onboarding of the Azure tenant	1 Tenant
VMware Horizon Configuration	Yes
AD Integration	1 AD
Application Integration	Up to 15 Commercial off-the-Shelf applications
Peripheral Integration	Up to 15 supported peripherals
Configuration of FSLogix, VMware DEM (up to 3 app profiles in DEM) & Validation of DEM shortcut & Drive Shared Mapping, WS1 Access Connector setup within HZC environment, pull in users from AD, Federate HZC for true SSO, configuration of 2FA (OKTA/RSA)	Yes
User Workload Configuration	RDSH/Windows 10 Single-Session/Windows 10 Multi-Session
User Provisioning	Yes
System Testing	Yes
Optimization (~4 Calendar Weeks)	
Stabilization	Yes
As-built document	Yes
Project closure call and services recommendations for Steady State Support Services	1 Session

CUSTOMER FEEDBACK

"Anunta and the team were one of the best vendors I have worked with while at the Company"
Project Manager, A Government Administration

"I would say 5's across the board. You guys have been very methodical and detail oriented in your project management and technical implementation. I was pleased with Prasanna's technical skillset, he seemed quite knowledgeable, especially when customizing UEM for us and trying to lower user profile loading times. I gave you guys raving reviews to Paul Smith who I met at your folks' booth at VMworld a few weeks ago. No complaints whatsoever. Appreciate your help on this and look forward to working with you guys again if that opportunity arises."
Technical Engineer, A Government Administration

"You guys get all 5's"
Technical Engineer, A Government Administration

Thank you Rama. You have been amazing. Stay safe!
Technical Engineer, An Environmental Services Company

I wanted to let you know that it was a good experience, and it still is for some of the remaining tasks, to work with your project team. Santthosh, Rajeev and Samir were very responsive to our questions, problems we had and they always tried to find workable solutions for our current network environment.
Project Manager, A Leading County in California

"Hi Samir, Just wanted to say how much I appreciate all the great work you and your peers have done for the County with DaaS. Really great to work with people that are so nice and good at their jobs. If you ever make it to the Bay Area lunch and a tour is on me. "
Technical Engineer, A Leading County in California

"No brainer. All 5's. I have worked in IT for over 20 years and without a doubt you are the best team I have ever worked with. I cannot say enough good things about you and the team. I am rarely at a loss when it comes to giving feedback, but in this case I have none. "
Technical Engineer, A Leading County in California

Customer success: Enabling a leading Environmental Services Company become Work from Home ready in 2 weeks during global pandemic.
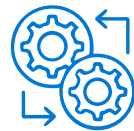

As an expert implementation partner of VMware, Anunta was engaged to work along with VMware, Microsoft, and Customer IT team to roll out the WFH solution organization wide.

Anunta's specialized End User Computing services enabled the organization to successfully deploy Cloud Desktops on Horizon on Azure for remote work in less than 2 weeks during the global pandemic worldwide.

Scalability

The client was easily able to onboard 3000+ concurrent users within 2 weeks after the solution was implemented.

End-to-End Management

Provided comprehensive Day 2 support services to enable the employees to work without any business disruptions.

High Application Availability

The different user groups were able to access the business applications seamlessly, which enabled the employees to work in their respective business functions without any disruptions.

ABOUT ANUNTA

Anunta is a recognized specialist in cloud and desktop virtualization technologies, delivering unmatched end-user experience with 99.98% application delivery and anytime, any device and anywhere access for superior user performance.

> **Anunta helps enterprises move to new generation End-User Computing (EUC) environments on cloud at large scale across industries including, banking and financial services, manufacturing, travel, media, aviation and IT.**

Delivering Unmatched End-User Experience

Managing **80,000+ endpoints** and **120,000+ users** globally and across different virtualization platforms.

Outcome and productivity-oriented SLAs, along with flexible engagement (on-premise and cloud) and pricing (per user per month and per endpoint per month) models.

Delivering the lowest incident-to-user ratios in the industry at **0.3** compared to industry average of **0.8 - 1.2*** incidents per user per month

*(*Gartner report 'IT Key Metrics Data 2017')*

Proactive identification and resolution of **76%**** issues before the end-users are even aware of it resulting in improved end-user productivity.

*(**as of March 2020)*

Highly secure **24x7x365** Enterprise Nerve Center monitoring and managing IT infrastructure to deliver superior end-user experience.

Patented AIOps platform, EuVantage®, providing deep cross-domain visibility, automated isolation, actionable analytics and dramatically reduced resolution times.

Marquee Clients:

3 of the top 5 private Indian banks

Top European insurance company

One of the top global BPOs

Large US & UK Electricity and Gas Distribution Company
